Artificial Intelligence and Theory of Computation

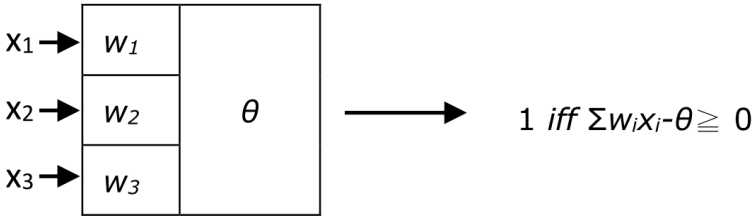

1. Consider the follow game tree.

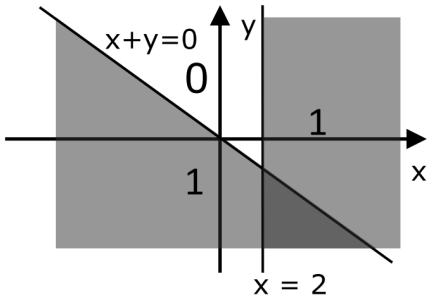

(a) Which move (A, B, or C) should Min choose?

(b) Suppose leaves are traversed from left to right. Mark which leaves can be pruned in the mini-max search.

2. We adopt the same notation we used in the lecture:

Construct a neural network to give the desired outputs in the following graph.

3. What are NP and NP-completeness?
